

OncoTherapy Science, Inc.
June 3, 2013

Announcement of patents obtained in April and May 2013

OncoTherapy Science, Inc. (hereinafter, "OncoTherapy") announces that OncoTherapy obtained the following patents in April and May 2013. OncoTherapy will announce its issued patents periodically from this fiscal year.

[Patents for Peptide Vaccines]

Patent No. ZL200680037419.8	Country: China
Patent No. 2119447	Country: Europe
Patent No. 5239103	Country: Japan
Patent No. 5239104	Country: Japan
Patent No. 2091965	Country: Europe

OncoTherapy is proceeding with the research of cancer peptide vaccines which can induce specific immune responses against cancer cells, and is conducting clinical trials using these peptides by itself or jointly with its licensing partner companies. The above patents obtained by OncoTherapy are related to those peptide vaccines, and are expected to accelerate the clinical developments.

[Patents for Antibodies]

Patent No. 8,435,749	Country: United States
----------------------	------------------------

OncoTherapy is proceeding with the research and development of cancer therapeutic antibodies which have ability of binding to cancer cells and killing them. The above patent obtained by OncoTherapy is related to these cancer therapeutic antibodies, and is expected to accelerate the clinical developments.

[Patents for Antibodies]

Patent No. 8,420,329	Country: United States
----------------------	------------------------

OncoTherapy is proceeding with the research and development of cancer diagnostic agents utilizing genes specifically over-expressed in cancer cells. The above patent obtained by OncoTherapy is related to the methods of diagnosis for prostate cancer.

OncoTherapy will continue to strategically obtain the patents for the anti-cancer drug candidates in order to promote the research and development of more effective and safer anti-cancer drugs.
