

Announcement of the number for patents obtained by OncoTherapy in each fiscal year

OncoTherapy Science, Inc. (hereinafter, “OncoTherapy”) has been announced patents obtained by OncoTherapy every two or three months as part of patent information disclosure since last fiscal year. As starting OncoTherapy’s new fiscal year, OncoTherapy announces the number of the patent registrations in each fiscal year to the last fiscal year this time. Information of patent registrations will be reported in the summary of financial statement supposed to be published at the end of each quarter hereafter.

The graph below shows the number of patent registrations in the world in each fiscal year. As shown in the graph, the number of patent registrations is gradually increasing year by year and expected to continue to increase. These issued patents include patents relating to diagnostic and therapeutic targets for cancer, vaccines, antibody drugs and so on. As the patent applications relating to small molecule drugs are increasing now, patents relating to such drugs will be issued in near future.

OncoTherapy is conducting eight kinds of clinical trials of anti-cancer drugs including vaccines, antibody drug, small molecule drug by itself or jointly with its licensing partner companies grounded in those patents and patent applications.

OncoTherapy will continue to strategically obtain patents in order to promote the research and development of more effective and safer anti-cancer drugs.
